

USABILITY TESTING

PARTICIPANTS

Spencer Barnes, 32

Dylan Diehl, 35

Brittany Sims, 35

Scope:

Test users' ability to **create**, **download**, **study**, and **edit** flashcard decks, so as to examine the app's four main areas of functionality

Direct Tasks:

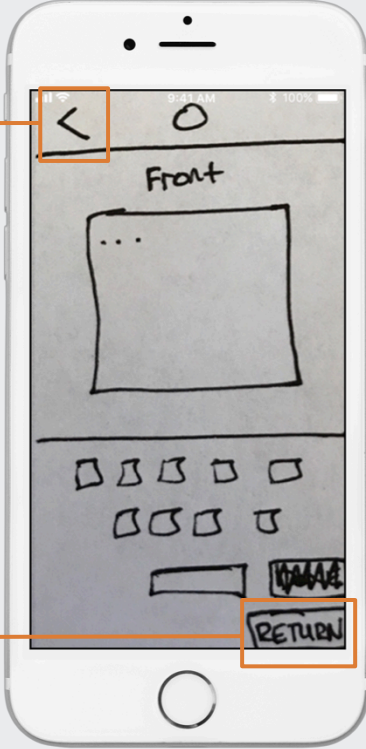

- Create a new flashcard deck
- Download a premade flashcard deck
- Study the downloaded deck
- Add an additional card to that deck

USABILITY TEST REPORT

TASK	OBSERVATION	SEVERITY	RECOMMENDATION
1 and 4	Users don't understand the function of the "Return" button	4	Change the name of the button to something more clear, such as "Save"
1	When viewing the second card in a deck, the back arrow sends users to the language selection screen	4	Change the back arrow destination on the second card from the language selection screen to the first card
2	Users don't realize that "Download" loads premade decks	4	Change the button's name and improve its onboarding description
	Users can't return home from the "Meetup" screen	4	Add a back arrow to the Meetup screen
3	Users try to advance cards by tapping instead of swiping	3	Add arrows to the sides of the screens to remind users to swipe
General	Users aren't sure when to tap and when to swipe	2	Add arrows on left and right sides of swipe screens
	Users are confused by the two different "+" buttons	2	Update these buttons so they are more distinct
	Users are confused by the term "Press" during onboarding	3	Change the wording on these screens
	Users want a search feature	0	No change needed, as users weren't hindered by its absence

Task #1 Updates

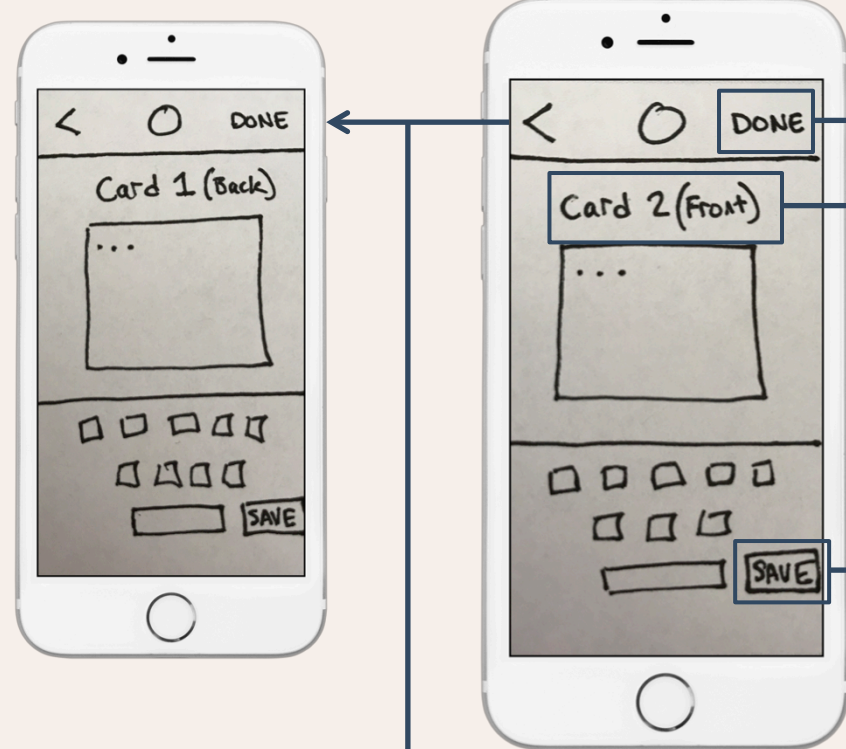

Initial Prototype: "Add Card #2"

The back arrow sent users to the language selection screen, instead of the back of card #1

Users thought the "Return" button returned you to the previous screen, instead of entering the info you typed into the card

Updated Prototype: "Add Card #2"

Added the option to exit the process to all screens

Gave each card a number for added clarity

Made the name of the button more clear, calling it "Save"

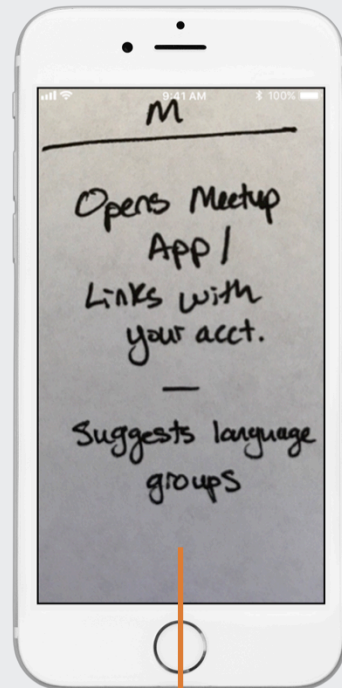

Updated the back arrow destination to the back of card #1

Task #2 Updates

Initial Prototypes: "Homepage" & "Meetup"

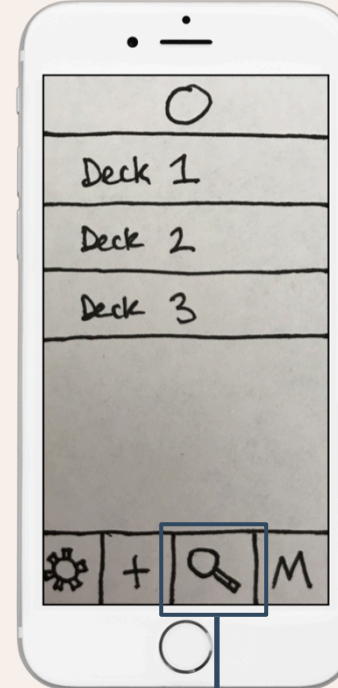

Users didn't realize the "Download" button adds premade decks

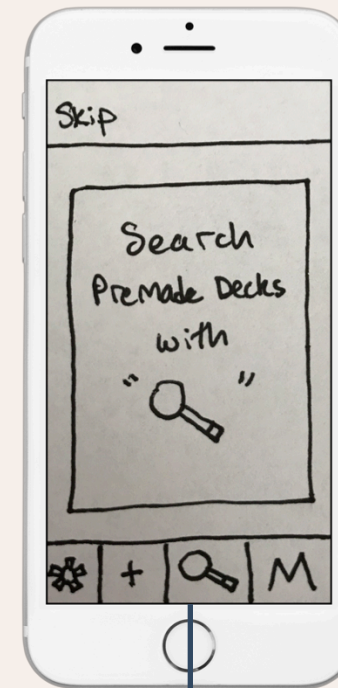

Users couldn't return to the homepage after pressing the "Meetup" button

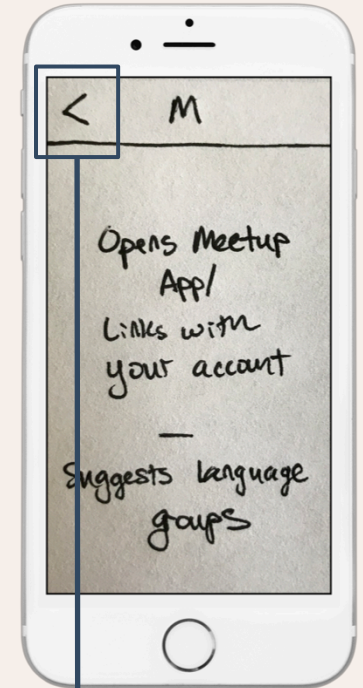

Updated Prototypes: "Homepage," "Onboarding Search" & "Meetup"

Updated button to match the apps from competitive analysis

Updated button in onboarding and made description more clear

Added back arrow to "Meetup" screen

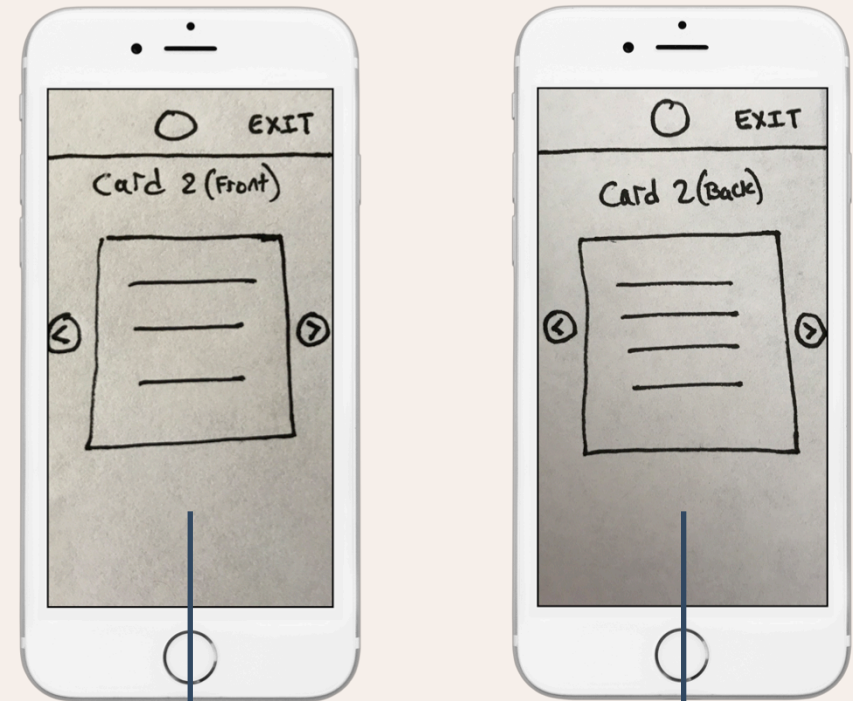

Task #3 Updates

Initial Prototypes: "Study Front Card" & "Study Back Card"

Users did not understand how to navigate between cards. (Tapping a front card would flip it over and reveal the back. Left swiping a back card would reveal the next card in the deck.)

Updated Prototypes: "Study Front Card" & "Study Back Card"

Improved card navigation by:

- adding arrows to remind users about the swipe function
- eliminating back arrow and adding right swipe to all cards
- giving users the option to exit

General Updates

Initial Prototypes: "Onboarding Add" & "Onboarding Edit"

Users were confused by seeing two different "+" buttons during onboarding. The inclusion of the word "Press" also led users to press the navigation buttons, which were inactive during onboarding.

Updated Prototypes: "Onboarding Add," Onboarding Edit" & "Deck Homepage"

Removed the word "Press" from onboarding screens

Removed the word "Press" and changed the icon

Added the new icon to the Deck Homepage

WORDLY

Vocab On-The-Go
